

PARKINGBLOCKS

MADE FROM 100% RECYCLED RUBBER

LIGHTWEIGHT DURABILITY

100% RUBBER

EASY – CONVENIENT – PROFITABLE – SAFE – EASY INSTALLATION – ENVIRONMENTALLY FRIENDLY

ABOUT PARKING BLOCKS

The rubber Parking block is used to effectively guide cars when pulling into a parking stall. It is profiled at 4" high, safeguarding potential damage to today's low, front end car designs. They are more resistant than concrete or plastic curbs.

Unlike concrete or plastic, which necessitate frequent replacements, recycled rubber car stops are safer and more durable. In-molded highway reflective tape (available in yellow or white) ensures visibility and pedestrian safety.

The Parking block is constructed of **100% recycled rubber**.
